Ambidextrous Vertical Mouse

Overview

The Penguin offers computer users new standards of protection against Work Related Upper Limb Disorders. It provides a simple but revolutionary solution to many of the common health problems associated with repetitive use of the dominant hand by allowing both hands to share the workload.

Features

- Naturally comfortable - the vertical alignment encourages a more ergonomic operating position
- Ambidextrous design - central 'bow-tie' switch allows for easy transition between right and left handed use
- Easy-glide symmetrical base - allows the user to rest either hand comfortably alongside the vertical structure, encouraging the use of the bigger muscles in the fore and upper arm to manoeuvre the mouse
- Performance laser tracking - for accurate tracking
- Variable DPI [400-600-800-1200] - adjustable pointer speeds
- Precision scroll wheel - for fast, accurate document scrolling including an auto-scroll feature
- Small, Medium and Large sizes - wired and wireless
